360 Virtual Tours of Weddings and Events

We offer a unique add-on service to wedding photographers – 360 virtual tour of weddings.

What are Virtual Tours?

Virtual Tours are simulation of an actual existing location, where you can pan around 360 degrees (horizontally and vertically). It's the next best thing to being there personally, as you can virtually walk through room, facilities and real estate location using only your computer and/or browser. And now we are offering to cover live events!

360 weddings can also include still photos and video clips from the event, you just click a person on the virtual tour and the still photo and/or video would appear.

It's better to explain virtual tours visually, view virtual tour coverage of a wedding;

Experience

We have done virtual tours for weddings, resorts, hotels, cruise ship and real estate.

Amazing, Fun & Exciting!

It's fun and amazing to see an event like a wedding in virtual tour, be able to click and see the other photos and videos as well. And we will host your virtual tour in a website and give you your domain name, not just any name, your own website address.

A Different Look

Navigating the virtual tour creates different experiences for the visitors, the way you navigate will always be different from the other visitors, hence, a unique experience but the same amazing feeling you would get after the tour.
